

Schälgerät Unicut; Peeling Tool (Patent)

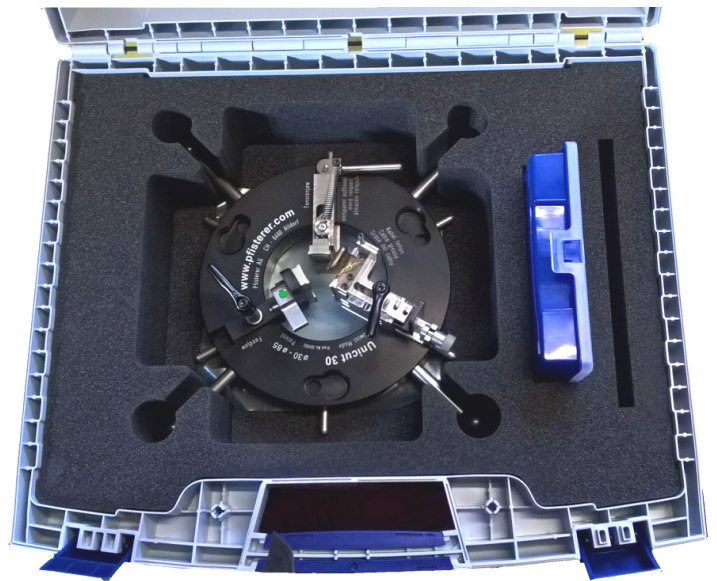

Unipower = Drive for Peeling Tool Unicut (Patent)

48 years of pioneers, 48 years of experience! Sliding jaw with profile surface are suitable for e.g. hard cable insulation in Siberia or soft cable insulation in the Sahara! Cables - out of round - are compensated with the Tensionjaw! You can work horizontally or vertically! The Unicut/Unipowersystem is our development, with sliding jaws, without rollers! Rollers touch the relatively soft cableinsulation convexly (= unstable), jaws touch the cable concavely (= stable)
Adjustment green: = go (with feed), red: = stopp (without feed). Including: Knife for peeling, Knives for Stripping, Knife for bevel!

Unicut 30 Ø 30 - Ø 85
Unicut 40 Ø 70 - Ø 125

Art. 880 280-775
Art. 880 280-776

Unicut 30 + Unicut 40 mit Feedjaw: for go or stopp

Unipower 34 R

Art. 880 265-216

für: Unicut 30 und Unicut 40
